

COURSE STRUCTURE

Course Code: INTA305IAE

Name of Course: Hi-Tech Entrepreneurship

Credit Hours: 4

Prerequisite/co-requisite:

Summary:

This module is intended to give students the opportunity to exploring the potential for commercialization of high technology new venture creation. This is a practical module where students working alone or in teams can develop a detailed commercialisation plan for launching their own new high-growth technology-based product or service. This module will allow students to gain first-hand experience of the creativity, leadership, planning, and team management skills involved in developing new intellectual property and/or initiating a new technology-based venture. Intellectual property commercialization and business planning are a multi-skilled task, and success will depend on the teams' ability to synthesise and apply knowledge from the entire programme including New Product Development, Strategy, Technology, Marketing, Finance and Management.

Course Learning Outcomes:

Upon completing this module, the students should be able to:

1. Reflect on their employability competencies and career management skills and plan for their future development
2. Identify and assess the role, characteristics and motivations of high technology entrepreneurs
3. Research, assess and defend a commercialisation plan for a new technology-based venture
4. Evaluate key strategies for successful new venture creation

Course Format:

For long semester (14 weeks) guided learning hours are

- Lecture: 1 hr(s). per week
- Tutorial: 2 hr(s). per week
- Laboratory: 0 hr(s). per week
- Guided Online Learning: 1 hr(s). per week

Note: Number of hours per week is doubled for short semester (7 weeks).

Total Student Learning Time (SLT) (L = Lecture; T = Tutorial; P = Practical; O = Others):						
Guided F2F Learning Hours				Guided Online Learning Hours	Independent Learning Hours	Total Student Learning Time
L	T	P	O			

14	28	0	1	14	103	160
----	----	---	---	----	-----	-----

Teaching and Delivery Methods/ Teaching Methodology:

Use items as tabulated in Table 4 section 8.

Teaching will be facilitated through a variety of methods which may include lectures, tutorials, lab works, workshops, online activities, discussion and field activities. Students are expected to engage in all activities.

This module also requires students to participate in additional self-directed study, coursework, assignment and project works to reinforce the learning gained from timetabled sessions. Formative assessment will be used to give students an early indication of their progress towards the course intended learning outcomes, also would prepare students for summative assessment if applicable.

Syllabus:

	Course Content Outline	CLO*
